MARKET

Demand for Pediatric Mental Health Services Continues to Grow

Telemedicine growth, reduced mental health stigma, and increasing need give Little Otter the momentum to dominate a previously underserved market.

Increasing Need for Support

Mental health emergency room visits for kids ages 5-11 increased by 24% the past year. **Rates of child anxiety and depression doubled in 2021.**

Acceptance of Virtual Care

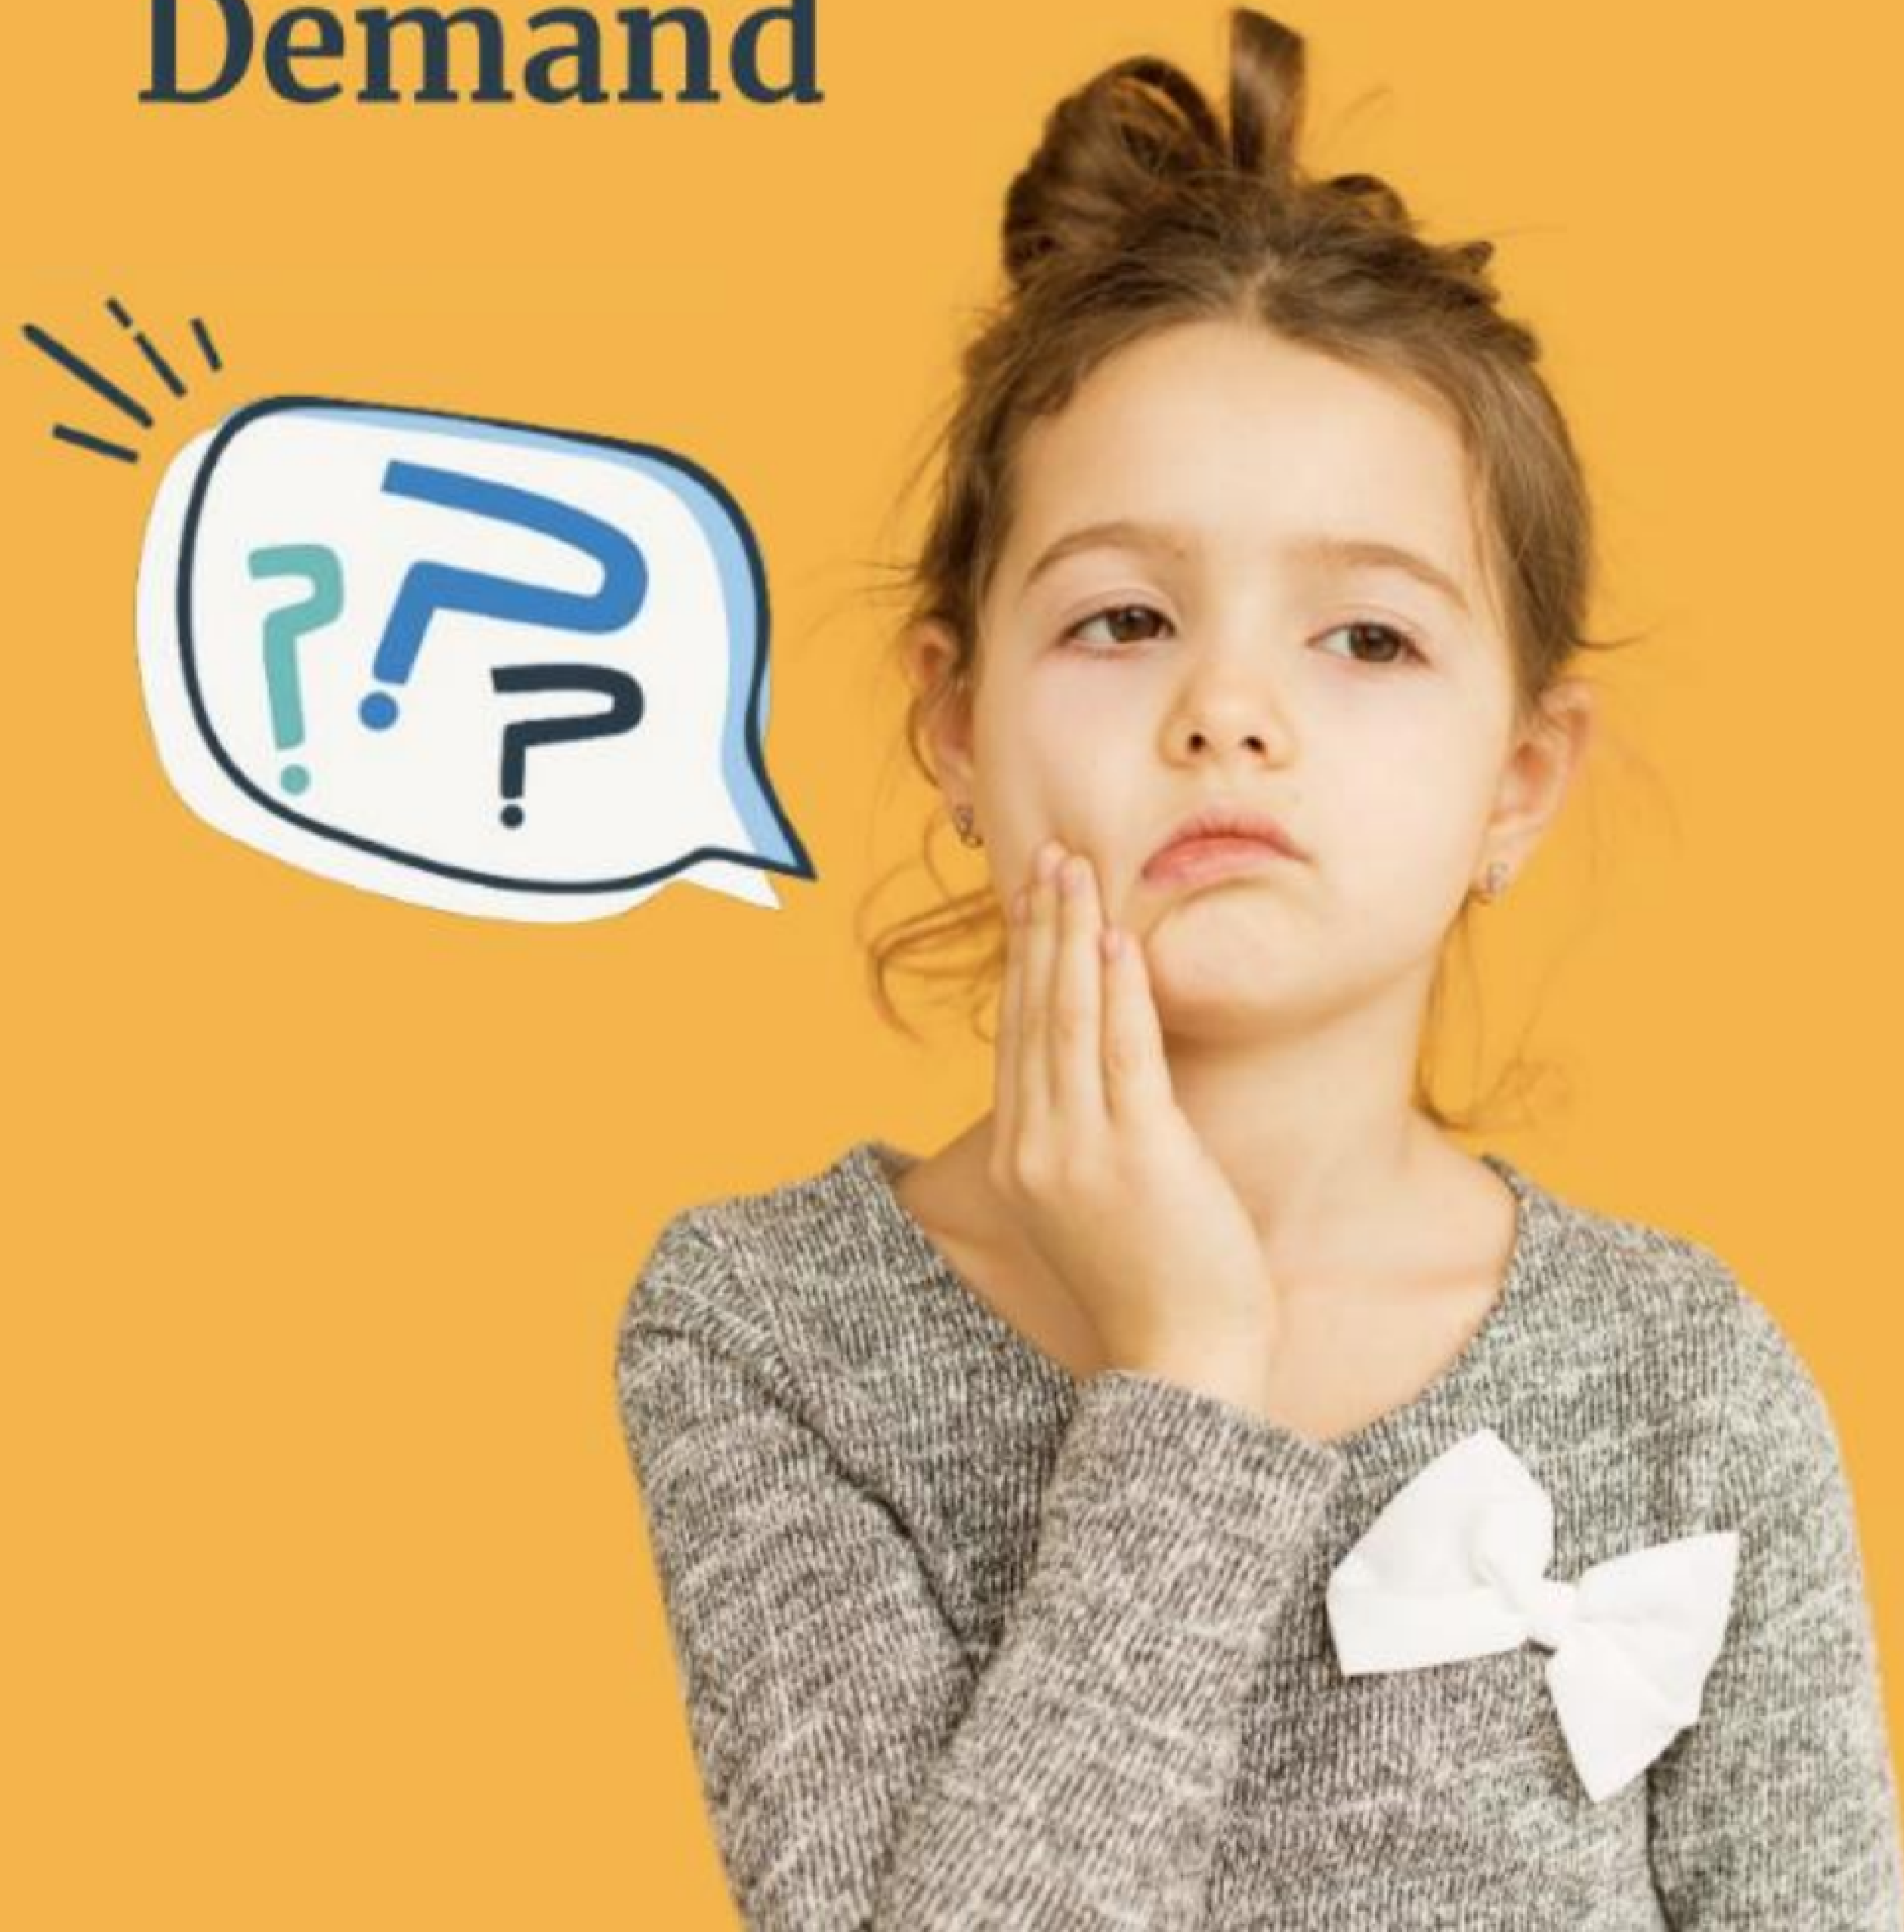

Families and providers have become comfortable with virtual care. **Studies prove that virtual care can deliver better outcomes than brick and mortar.**

Reduced Stigma

A generation of adult-focused mental health services have paved the way for new populations. **This generation of parents is the most accepting of therapy in history.**

PROBLEM

Existing Solutions Cannot Scale to Meet Demand

50% of mental health disorders

present by age 14, but assessing and **providing care for young children requires specialized training and expertise.**

83% of providers

on insurance panels no longer accept new patients. Existing care is rarely evidence-based, and **practices don't have the tech or skills to scale.**

8-16 week wait

to see a child mental health provider.

72% of counties in the US have zero child psychiatrists. Brick and mortar will never solve this problem.

SOLUTION

Little Otter Has the Expertise to Deliver High-Quality Pediatric Mental Healthcare at Scale

We solve this through expertise, digital innovation, and telemedicine.

1. Proprietary Triage

We identify underlying issues early, delivering the right type of care at the right time to improve efficiency and outcomes.

2. Accessible & Personalized

Care delivery is streamlined and accessible, making it easy to receive care and deliver evidence-based treatment at scale.

3. Whole Family Care

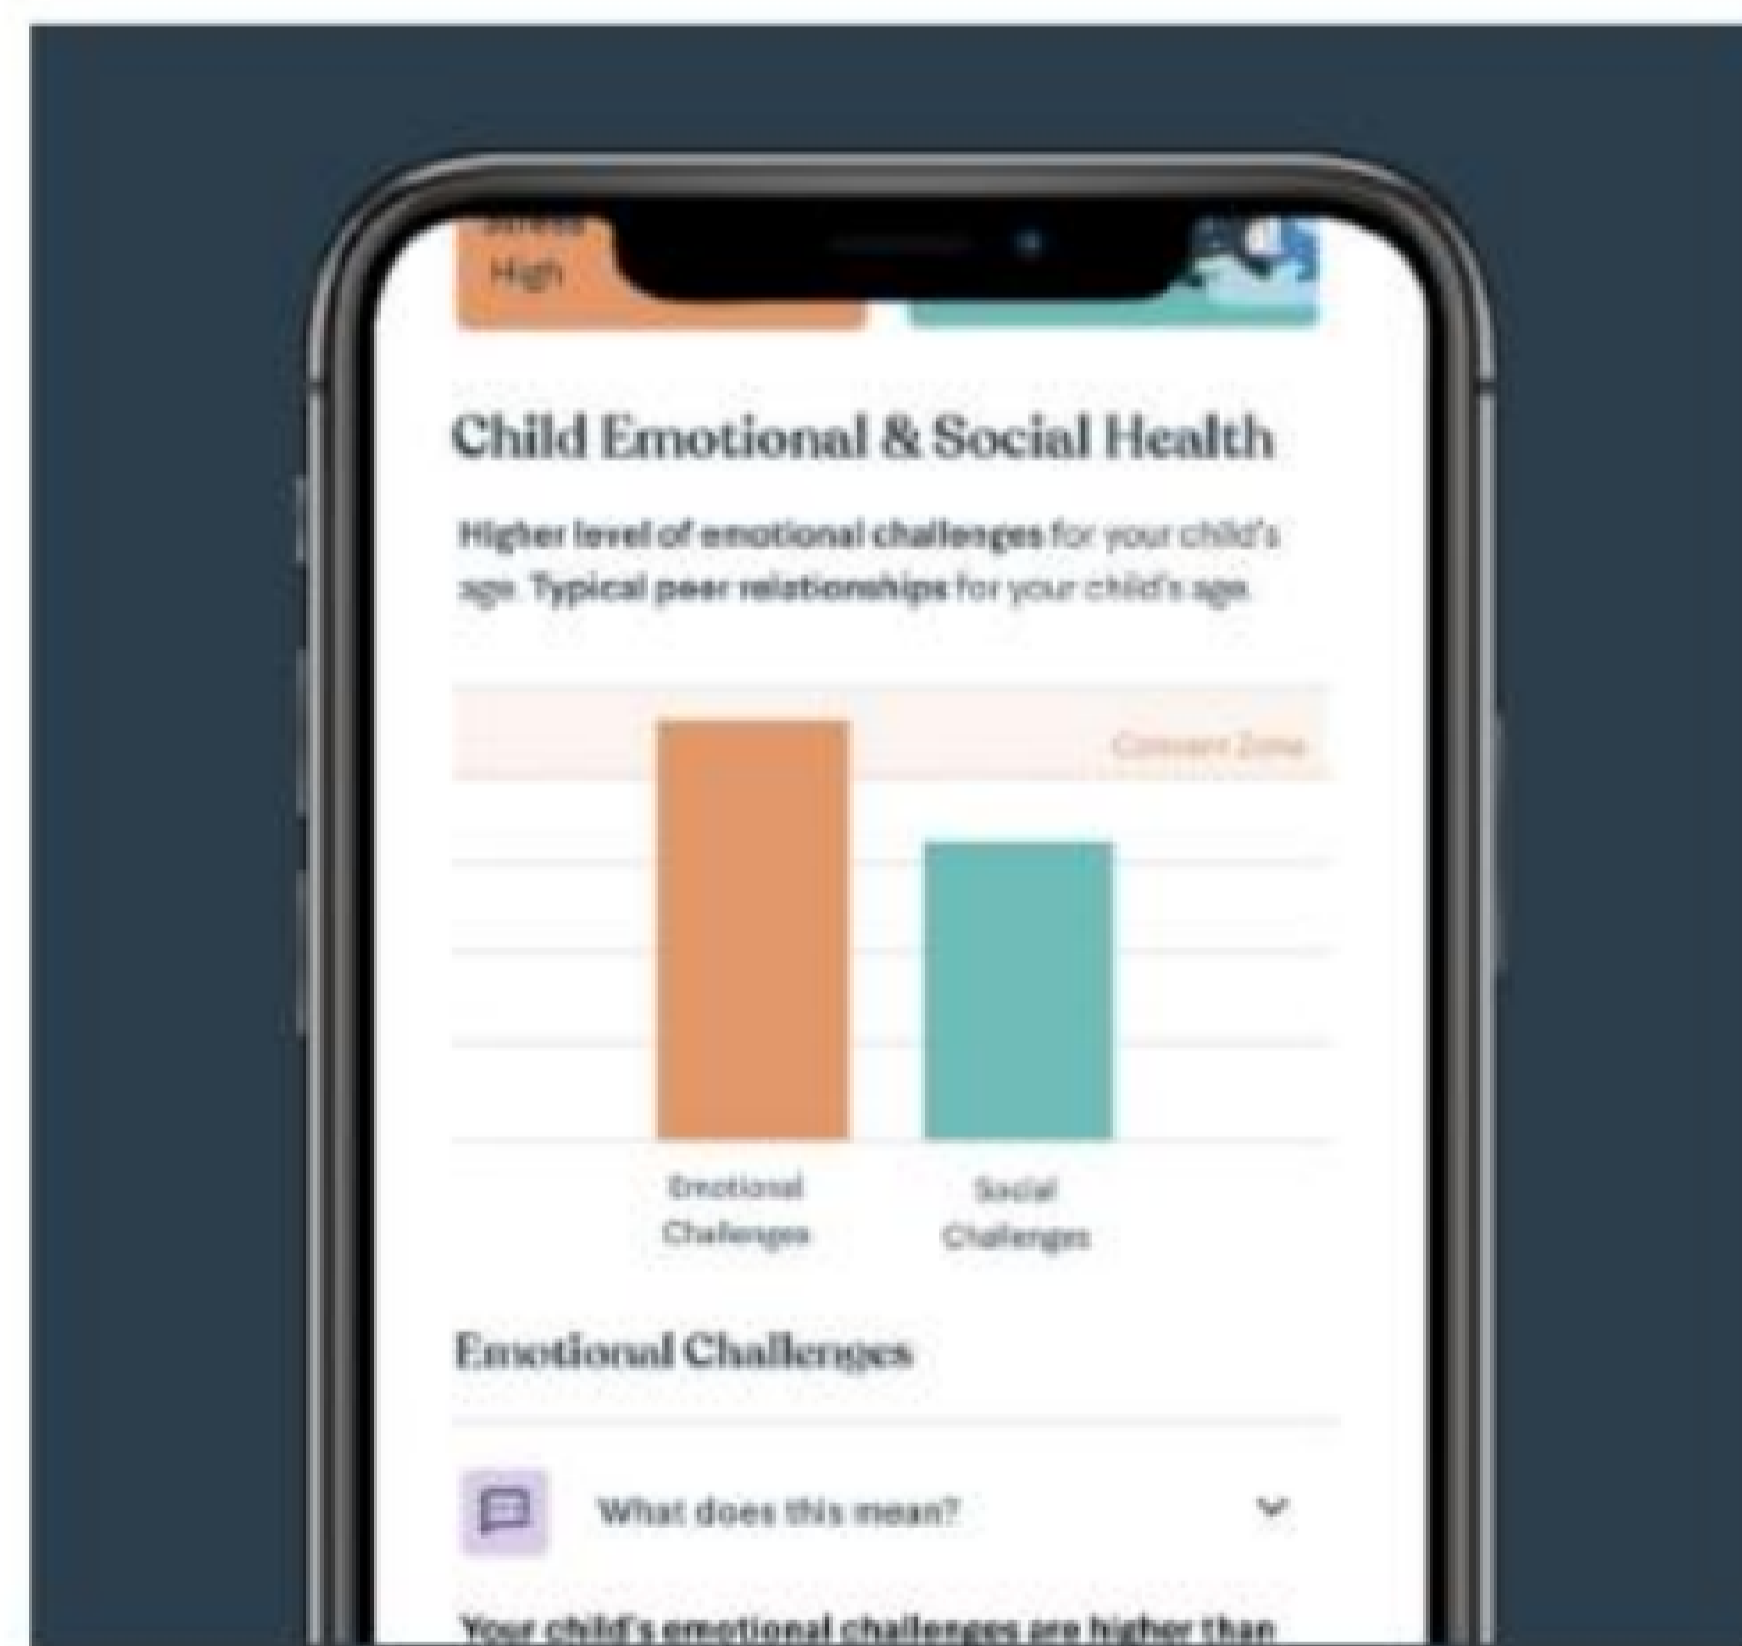

A new model designed specifically for families and young children, leveraging the benefits of telemedicine and digital interventions.

We Support Families at Every Stage of Their Mental Health Journey

The one-stop shop for a family's mental health. Families not ready for treatment can access assessments and personalized content in- app.

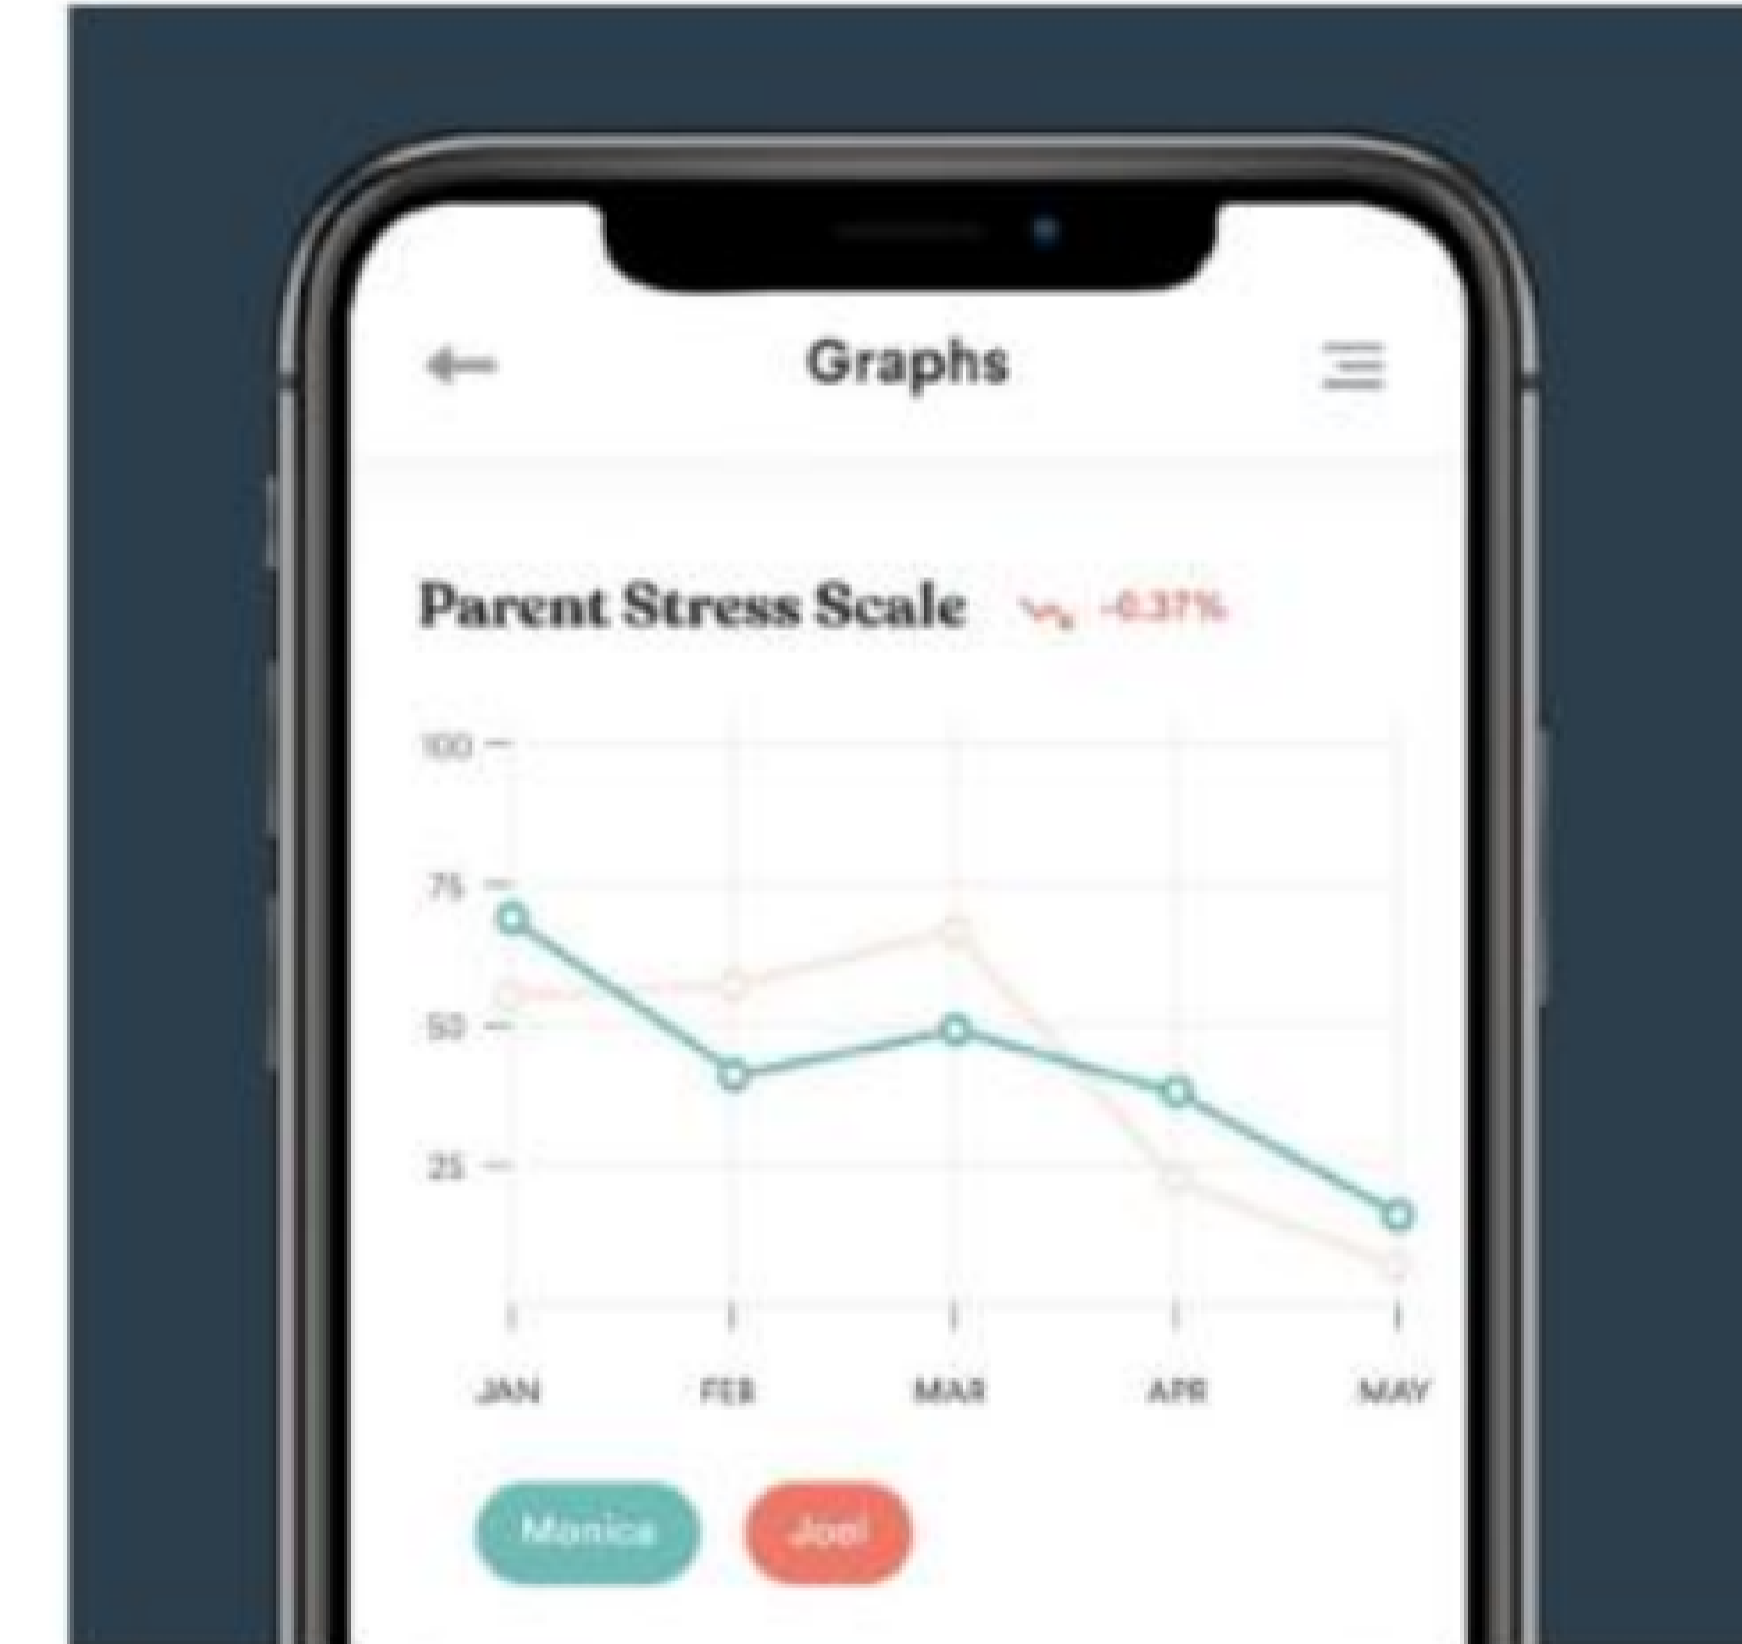

Assessment

Proprietary Triage and Personalized Reports

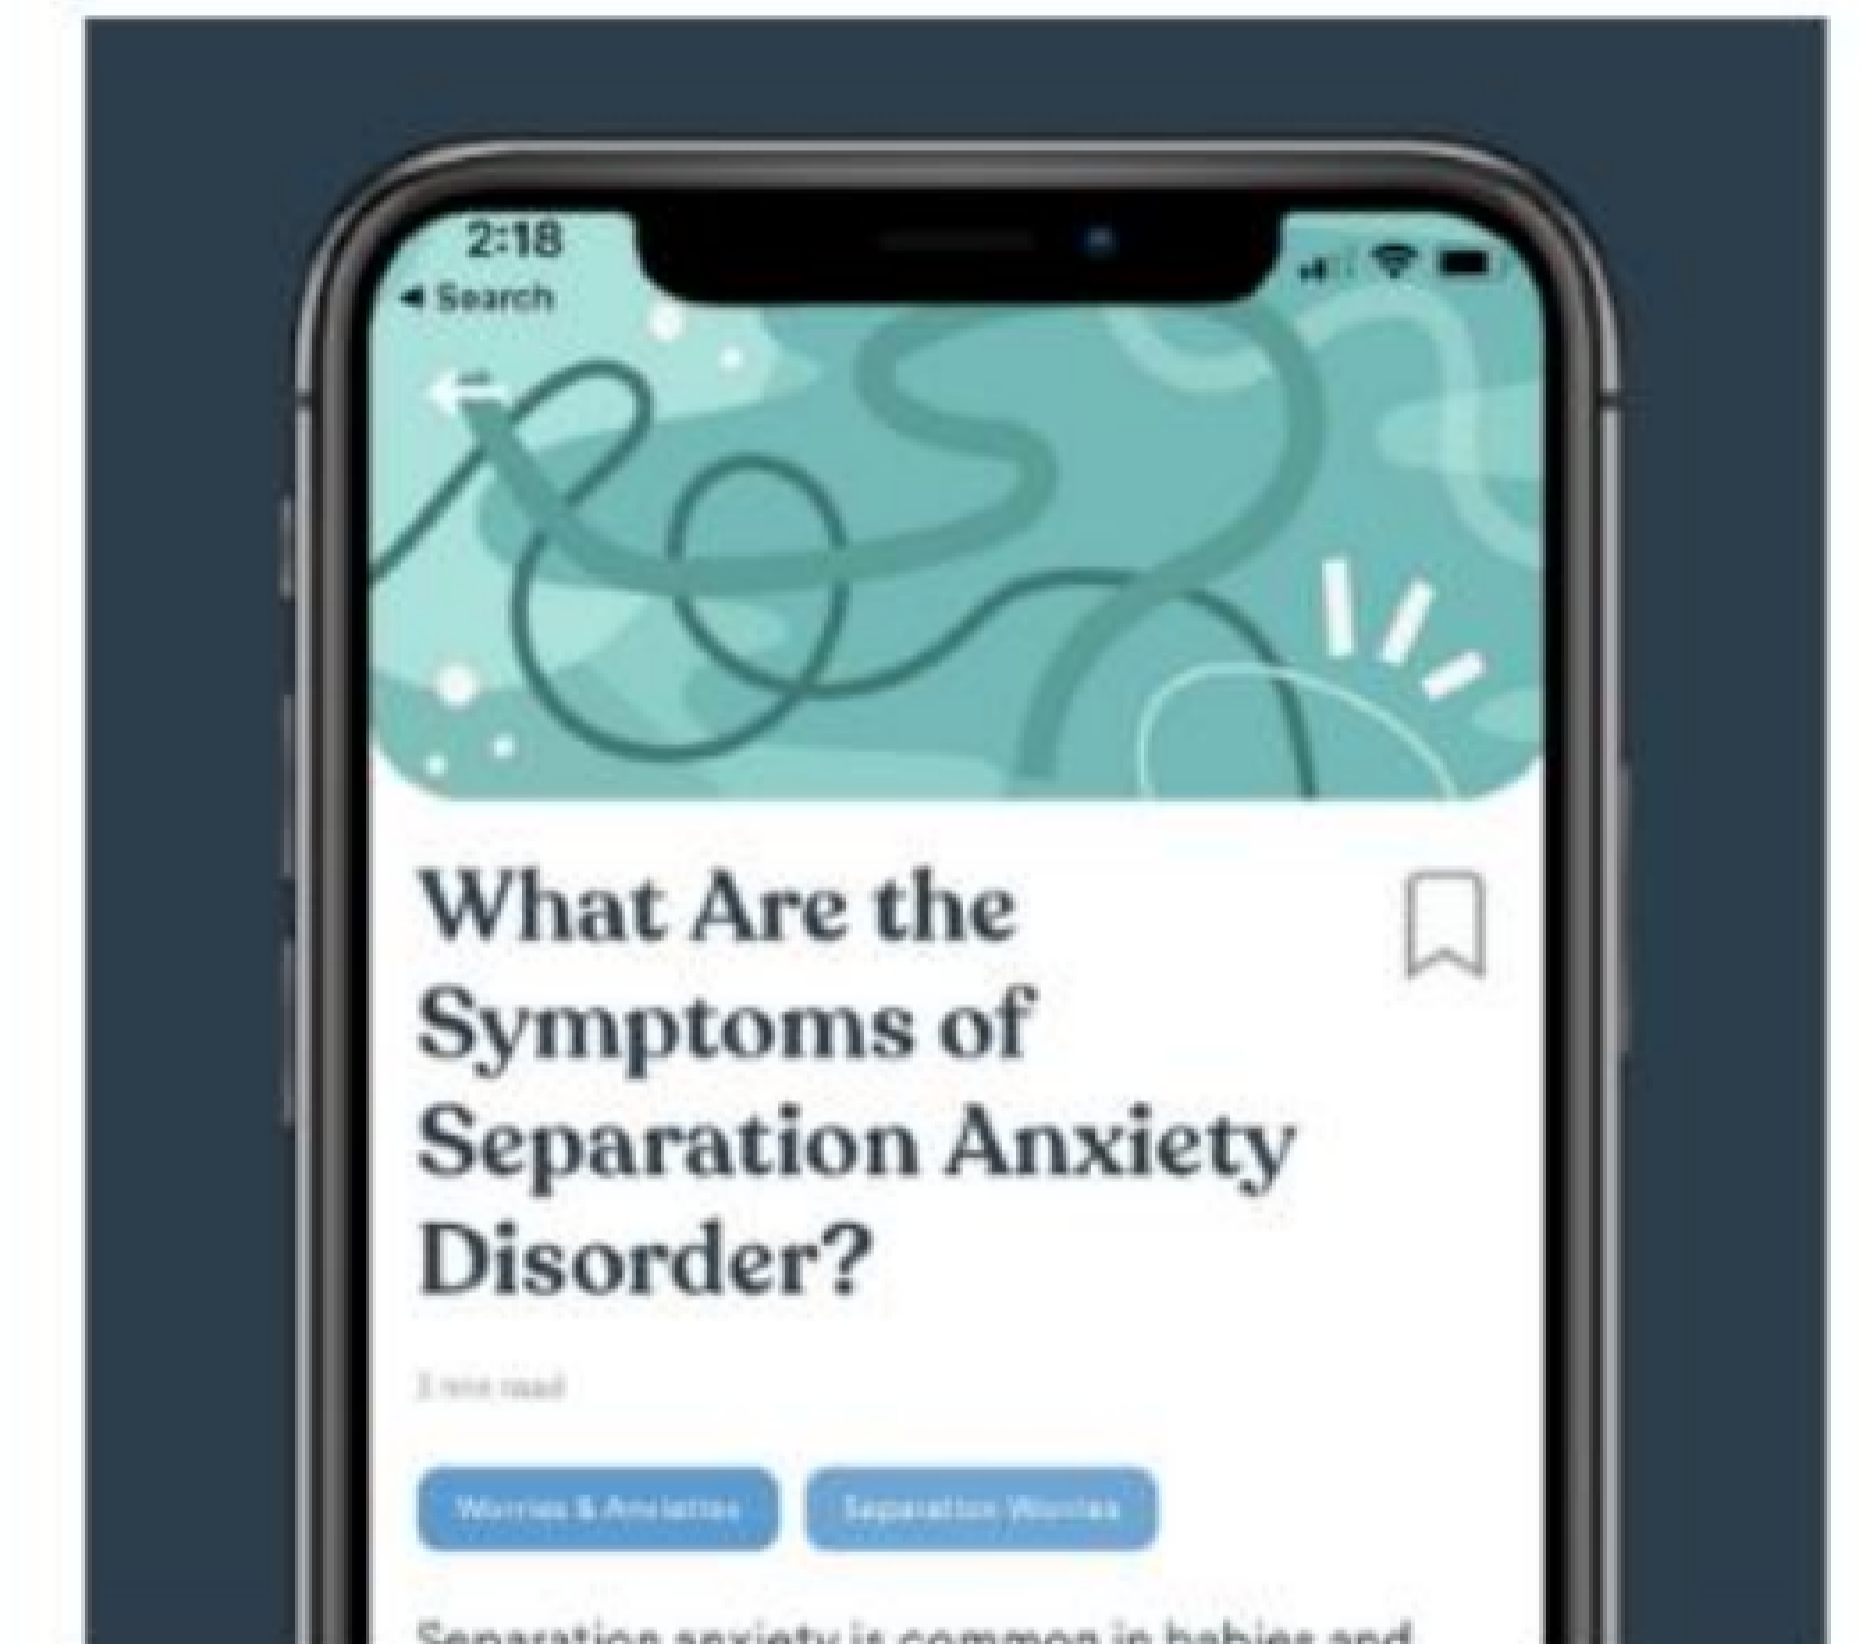

Treatment

Family care team and treatment plan

Growth

Goal setting and outcome tracking

Education

Personalized resources and in-app activities

RESULTS

We are Seeing Incredible Clinical Outcomes

Our model has an impact within 6 weeks of seeking treatment

Of children have moved from clinical to subclinical within 6 weeks

vs 13% baseline in longer treatments

Of parents reported reduced impact of emotions/behavior

vs 28% baseline in longer treatments

Our Approach Works

- Single entry point with proprietary triage
- Clinical Care Teams (20% of families see multiple providers)
- Standardized care pathways for the entire family
- Data-driven care (video, audio, screening, assessments)
- Medical oversight and integrated medication management

Baseline from 93 quantitative + qualitative treatment outcome studies; European Child & Adolescent Psychiatry 2020.

INVESTMENT

Our Offering is a Cost-effective Investment for Insurers and Partners

Mental health treatment is expensive today...

Annual **incremental total health** cost of a child with a mental disorder is estimated to be ~\$3K¹

Preventing a single pediatric mental health hospitalization is estimated to create **savings of ~\$14K²**

...And even costlier in the future

Interventions are estimated to generate healthcare and social benefits of 2-32X the investment³

We are experts in early intervention

- Efficient triage leads to optimized use of provider time
- Our assessments identify early warning signs, leading to less overall cost.
- A care model that produces efficient results
- Integration with pediatrics and care navigators

1. CDC, Clinical and Economic Burden of Mental Disorders Among Children With Chronic Physical Conditions; 2. Journal of Pediatric Health Care, Reducing Healthcare Costs for Mental Health Hospitalizations With the Evidence-based COPE Program; 3. Centre for Mental Health, London, Investing in children's mental health
